

## Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 10, 2007

Water Body Under Evaluation:

Water Body ID #: 1690  
Name: Tributary to Brown's Branch (Class C)  
Length of Segment: 3.0 miles  
County(ies): Franklin

Use Attainability Analysis (UAA) Study:

UAA ID #: 0372  
Submitter: Pickett Ray & Silver, Inc.  
Date(s) Conducted: May 8, 2007  
Date Received: June 5, 2007  
Use Evaluated: Whole Body Contact Recreation (WBCR) and  
Secondary Contact Recreation (SCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in May 2007 and no WBCR was observed. No interviews were conducted during the survey. This stream is also referred to as "Brown's Branch," however the name appears in Table H of the 2005 Water Quality Standards as "Tributary to Brown's Branch."

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The stream met the maximum depth criterion at 1 of the 3 sites evaluated, and was close at one other. Due to meeting the maximum depth criterion, the committee recommends the WBCR use designation be assigned. No evidence of SCR was found in this or any previous UAA, therefore the committee supports the 2005 Water Quality Standards where the SCR use designation was not assigned.

**Committee Recommendation:**

☒ Add Use ☐ Retain Use ☐ Remove Use  
☐ Modify Use ☐ Inconclusive
